OBJECTIVE

Seeking a Software Developer position conducive to skill enhancement, professional advancement, and contribution to organizational growth.

EXPERIENCE

Nettantra Technologies (India) Pvt Ltd
Bhubaneswar, Odisha

Software Development Engineer-1   November 2021 - Present

- **Artisan v4**: Cloud-based EMR & Fertility Records.

Role: Full Stack Developer

Feature: HIPAA & Cloud-based EMR and practice management system for fertility clinic, including patient info, laboratory management, scheduling, billing and reporting.

Collaborate with 8 team members to migrate the project from V3 to V4. Implement backend and frontend logic, test for data accuracy, no record loss and security. Managed laboratory, patient, and embryo data for 4 types of clinics.

I have successfully addressed and resolved issues within our ongoing artisan project, ensuring smooth functionality and optimized performance.

Technology :- React Js | Next Js | Tailwind CSS | Laravel | MySql

- **Artisan**: Self-Serve Appointment Tool.

Role: Frontend Developer (Lead)

Feature: We developed the appointment booking tool from scratch with 4 team members, ensuring tailor-made functionality and seamless integration with our Artisan project, thereby enhancing user experience and fulfilling specific client requirements. This initiative represents a comprehensive solution crafted with precision and expertise.

Technology :- React Js | Tailwind CSS | Laravel | MySql

- **4 hamlet** : Sexual Health Ecommerce Solution

Role: Frontend Developer

Feature: Revamped healthcare access with an ecommerce store from scratch with 3 team members. Seamlessly integrated services, streamlined inventory, & enhanced customer experience, leading to increased sales.

Technology :- Next.js Commerce | Tailwind CSS | Node.js | Express.js | Postgres
